MOD. BOX Z VALUABLES LOCKER

DESCRIPTION

BOX Z lockers are ideal for holding small belongings. Thanks to their versatility, they are ideal for installation in areas under surveillance such as entrances and reception areas of sports centres, spas, malls and schools.
They are made with stratified HPL laminate, with anodised aluminium profiles, highly resistant materials, that do not erode with continuous and constant cleaning with detergents, disinfectants, steam and high-pressure water and that ensure practically unlimited durability, even when used in extremely humid environmental conditions.
The doors, available in a wide range of colours, are made of stratified solid wood HPL with 8 mm thickness; the white structure is also HPL.
Standard locks: key operated or padlockable.
Optional locks: with mechanical or electrical combination, or according to specifications.

Dimensions	cm
DOOR HEIGHT	25
BLOCK 5X3 - 15 Pt.
