TECHNICAL DATA SHEET LOCKERS

MOD. VALUABLES LOCKER VARIOUS

DESCRIPTION VALUABLES LOCKER

Patentverwag valuables lockers are the perfect solution to place your personal effects and other small objects in full safety.
Thanks to their versatility, they are ideal for installation in areas under surveillance such as entrances and reception areas of sports centres, spas, malls and schools.
The structure is made by stacking and putting together side-by-side ABS box monolithic elements, dark grey.
The panel doors are made with silver extruded, anodised aluminium profile with incorporated hinge inserted in the vertical profiles, rotating on special self-lubricating nylon elements.
The silver anodised aluminium load bearing profiles are fixed by self-threading screws to the perimeter structure, built with very robust HPL laminate, 14 mm thick, white with matte finish.
The cylinder lock comes with two special double map keys, non-duplicated, made with nickel-plated brass.
The number is hot engraved on the lock's finish mask.
It is wall-mounted with expansion dowels.

Dimensions	mm
DOOR HEIGHT	160
COMPOSITION STANDARD MODULES	20 Pt (5x4)
	30 Pt. (5x6)
	50 Pt. (5x10)
