TECHNICAL DATA SHEET BENCHES

MOD. LIGHT DOUBLE

DESCRIPTION

Light benches are characterised by the seat slat designed to contain costs, without foregoing on the appealing design, comfort and strength.
The ribbed aluminium profiles inside guarantee excellent resistance to loads.
The coloured insert in the seat makes it an accessory that coordinates with the rest of the furniture
The hardness is guaranteed with resistant and stainless materials, such as anodised aluminium, HPL laminate, steel and nylon.
The double bench is composed by putting two single benches back to back, the modularity of the elements allows suitable structures to be composed for every need, starting from the simple seat to the full backrest, coat hanger, bag rack and shoe rack.
Safety and hygiene are guaranteed by the use of fireproof and anallergic materials and a design that does not allow water, dust or dirt to collect.
