TECHNICAL DATA SHEET BENCHES

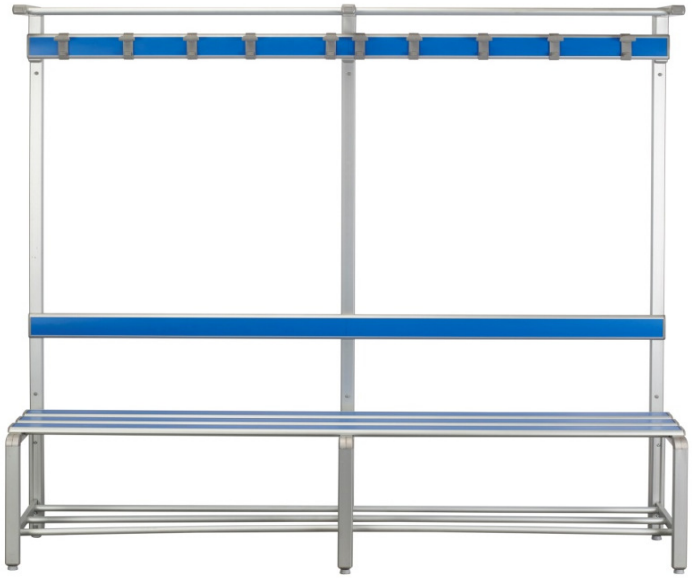

MOD. WELLNESS DOUBLE

DESCRIPTION

The Wellness benches are characterised by a seat composed of three anodised aluminium slats, with coloured laminate insert, that makes them perfectly coordinated with the rest of the furniture.
The ribbed aluminium profiles inside guarantee excellent resistance to loads.
The hardness is guaranteed with resistant and stainless materials, such as anodised aluminium, HPL laminate, steel and nylon.
The double bench is composed by putting two single benches back to back, the modularity of the elements allows suitable structures to be composed for every need, starting from the simple seat to the full backrest, coat hanger, bag rack and shoe rack.
Safety and hygiene are guaranteed by the use of fireproof and anallergic materials and a design that does not allow water, dust or dirt to collect.
