TECHNICAL DATA SHEET WALLS

MOD K I - K E DOOR

DESCRIPTION

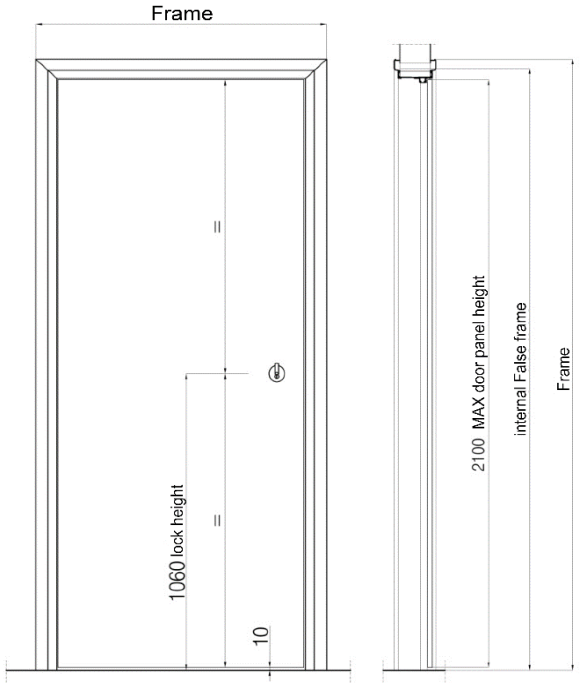

The doors of the K series are made with HPL (High Pressure Laminate) with 14 mm thickness (certificate B-s1, d0), very hard material, ideal for resistance to water, steam and chemicals.
The frame is natural anodised aluminium, while the aluminium hinges are equipped with an internal spring device for automatic closing.
The locks are nylon Patentverwag, with vacant/occupied device than can be actuated from the outside in case of emergency, alternatively Meroni "FORMA" locks with key or L/O device

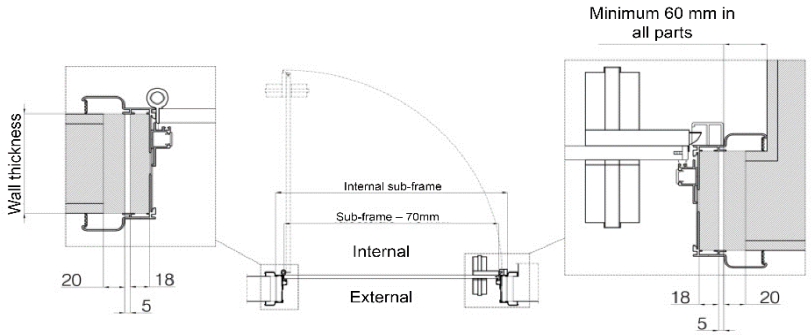

The maximum height of the door is 210 cm.
