TECHNICAL DATA SHEET WALLS

MOD JUNIOR PARTITIONS

DESCRIPTION

The urinal partitions of the Junior series are made with robust HPL (High Pressure Laminate) slabs with 14 mm thickness (certificate B-s1, d0), very hard material, ideal for resistance to water, steam and chemicals.
They are raised from the ground by a shaped form.
Anodised aluminium profiles allow ground anchoring and wall fixing of the panel.
A stainless steel angular element gives the partition stiffness and support.

PARTITION

MODEL	JUNIOR	
DIMENSION	104x64	
FIXING GROUND WALL	"JOLLY" PROFILE ANODISED ALUMINIUM STAINLESS STEEL STIFFENING ANGLE BRACKET
