MOD SYNTEC with bench PARTITIONS

DESCRIPTION

The partitions of the Syntec series with bench are made with robust HPL (High Pressure Laminate) slabs with 14 mm thickness (certificate B-s1, d0), very hard material, ideal for resistance to water, steam and chemicals.
The front panel, coupled to the internal side attached by a top crossbeam and on the ground by aluminium feet, makes it possible to install an HPL laminate bench creating a pre-shower/changing space in front of the shower, this structure gives the system stability
The height of the panels from the deck is obtained with a natural anodised aluminium and nylon pin configuration.
The profiles for the wall fixing system is anodised aluminium.
There is an optional perforated stainless steel angular element that provides greater rigidity and support to the partition, at the same time allowing the liquids to flow out.

SHOWER PARTITION with BENCH dimensions		
MAXIMUM PANEL HEIGHT		210 cm
RISER	STANDARD FOOT	10 cm
	FLOOR PANEL	
DEPTH PARTITION	AS PER DESIGN	
LAMINATE COLOUR	IN STOCK	WHITE - 1 / SAND - 1 / GREY - 1 / LIGHT BLUE - 1
	ON ORDER	READY IN 6 - 8 WEEKS
