MOD STANDARD ROTATING CUBICLE

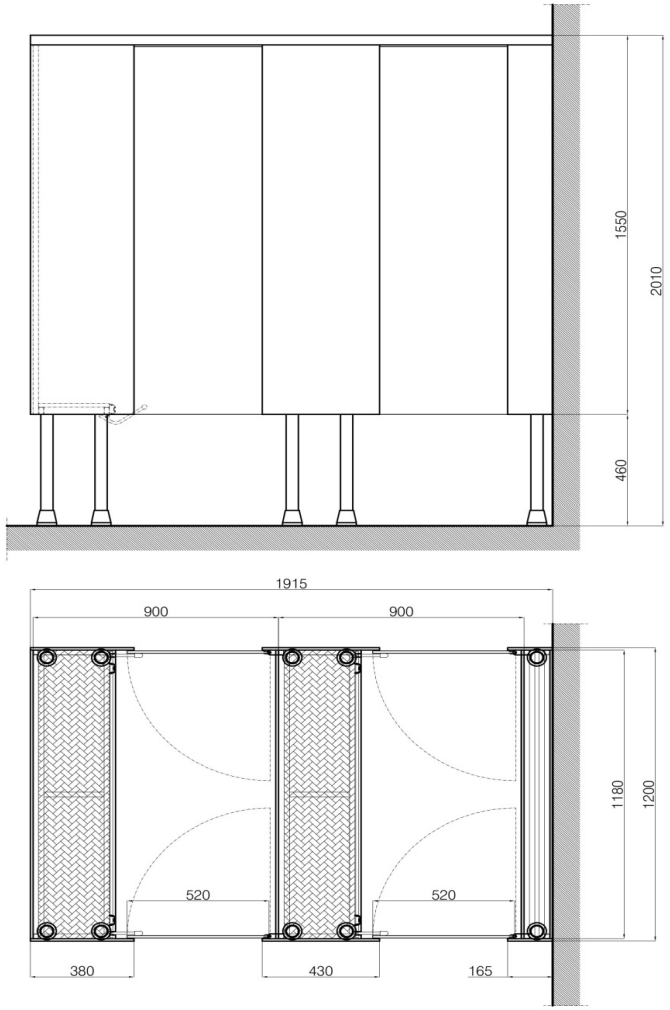

DESCRIPTION

Rotating cubicles are used in changing rooms of swimming pools where there is a strict separation of footwear routes and barefoot routes.
This strict separation is obtained through rotating cubicles that therefore have two functions: as an actual changing area, where the user can switch from footwear to bare feet and vice versa; as well as a separating element between two areas obtained through the due arrangement of rows of cabins and partitions;

ROTATING CUBICLES

GENERAL ROTATING CUBICLE DIAGRAM

ROTATING CUBICLE dimensions		
HEIGHT		200 cm
PANEL RAISED HEIGHT		40 cm
DOOR WIDTH		52 cm
WIDTH	TOTAL INTERNAL	90 cm
	EFFECTIVE INTERNAL	58 cm
	BENCH	30 cm
DEPTH		120 cm
LOCK	LIFT UP BLOCK	
LAMINATE COLOUR	IN STOCK	WHITE - 1
	ON ORDER	READY IN 6 - 8 WEEKS
