TECHNICAL DATA SHEET GRANDSTANDS

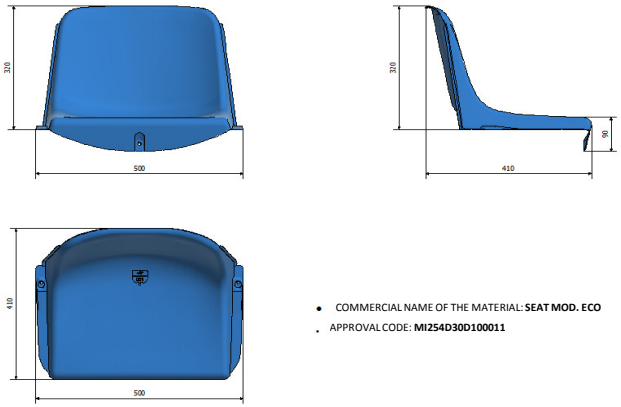

MOD. ECO SEATS

TECHNICAL DESCRIPTION

Seat with low backrest (h 32 cm.), moulded copolymer polypropylene with anti UV treatment (against the action of ultraviolet rays on the colour) and class 1 fireproof according to the legal regulations.
Polished and shiny surface featuring satin finish lines along the supporting ribbing of the seat surface.
Washing or rain water is dispersed through a series of slots under the cap.
The seat was tested for resistance to stress much greater than established by standards **EN 12727/00**.

Installation: there are four fixing points: one at the front on the front ribbing, one on the seat surface and two on the side stiffening slats. Fixing is usually carried out with nylon expansion dowels (HILTI) with stainless steel screws and washer to spread the stress (dowels-screws-washers supplied separately).
There is no supporting metal frame

- COMMERCIAL NAME OF THE MATERIAL: **SEAT MOD. ECO**
- APPROVAL CODE: **MI254D30D100011**

DIMENSIONS	CM.
WIDTH	50
DEPTH	41
