MOD. COMP/S LANES

DESCRIPTION

Mod. Comp/S swimming pool lane lines feature discs with a special design, with a perimeter composed of segments in a comb arrangement, that allow the elements to fit together perfectly, creating a lane with a uniform surface, continuous for the entire length.
This feature allows the lanes to be handled without the risk of breakage during maintenance and guarantees swimmers that there are absolutely no sharp edges in case of impact.
Comp/S lanes come in three measures of width and diameter, and in different colours.

TYPE		
COMP/S COMP/S 110 COMP/S 150	FLOAT DIAMETER	90 mm 110 mm 150 mm
MATERIAL	POLYPROPYLENE, with additive for light resistance
