MOD. START B/SX STARTING BLOCK

DESCRIPTION

Model Start B/SX starting block is designed for use during races and is made entirely of AISI 316 stainless steel.
The starting block and adjustable back footplate feature a perfectly non-slip surface, in full compliance with international regulations.
The high type Start A/SX block requires poolside installation on deck overflow pools, where it is normally installed behind the gratings.
The diving plate position is adjustable, as is the back footplate, which, through an invisible device, can be completely removed during daily use and put back in place for races.
