GRATINGS SWIMMING POOL PARALLEL

MOD. PP/S; PP/M; PP/L

DESCRIPTION

The parallel to edge gratings are designed in two different models: model PP, made of modular elements through STAINLESS STEEL tube, to guarantee maximum resistance to strong loads, reaching the maximum width of 120 cm; model PL, characterised by modular monolithic elements.
Made with high density polyethylene, they are resistant to wear, to chemical and atmospheric agents.
