TECHNICAL DATA SHEET LOCKERS

MOD. A 150 I P 325 / 430
A 150 I P R 325 / 430
INDUSTRIA

DESCRIPTION

Changing room locker on bench with aluminium slats and coloured HPL insert.

The INDUSTRIA line of lockers is characterised by an inclined roof and dirty/clean partition and guarantees the maximum possibility of hygiene, the essential requirement for changing rooms in food, pharmaceutical factories, hospitals and residential care homes.
All Patentverwag lockers are made in stratified HPL, with anodised aluminium profiles, highly resistant materials, that do not fear continuous and constant cleaning with detergents, disinfectants, steam and high-pressure water and that ensure practically unlimited durability, even when used in extremely moist environmental conditions.

The doors, available in a wide range of colours, are made of stratified solid wood HPL; the white structure is also in HPL.

Standard locks: key operated or padlockable.
Optional locks: with mechanical or electronic combination, with token/coin or according to specifications.

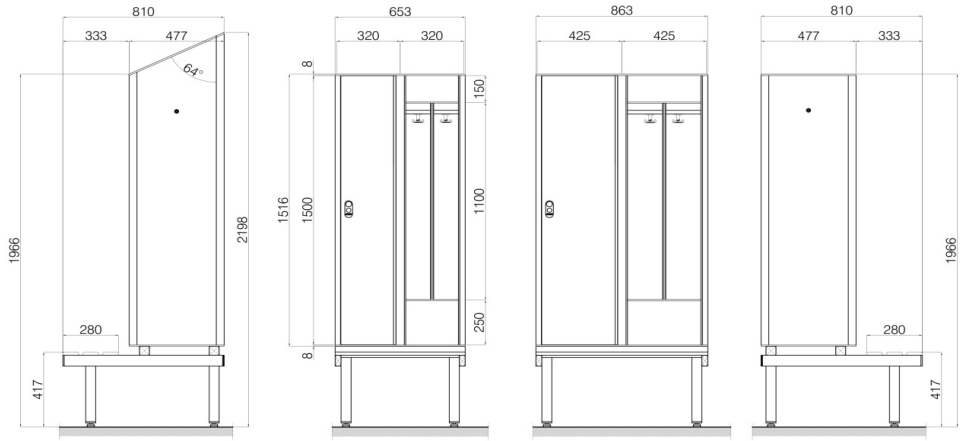

LOCKER WITH CLOSED DOORS

LOCKER WITH OPEN DOOR
