TECHNICAL DATA SHEET LOCKERS

MOD. A 180 C
A 180 C I R B
CUSTOM

DESCRIPTION

The CUSTOM line of lockers allows the customisation of some formal and dimensional aspects such as door width, locker depth, the riser, the presence of holes to guarantee ventilation. the lockers in the FITNESS and INDUSTRIA lines can also be modified.
All Patentverwag lockers are made in stratified HPL, with anodised aluminium profiles, highly resistant materials, that do not fear continuous and constant cleaning with detergents, disinfectants, steam and high-pressure water.
The anodised aluminium base, in contact with the floor, avoids the possibility of dirt and dust from collecting under the locker.
The doors, available in a wide range of colours, are made of stratified solid wood HPL; the white structure is also in HPL.

Standard locks: key operated or padlockable.
Optional locks: with mechanical or electronic combination, with token/coin or according to specifications.

LOCKER WITH CLOSED DOORS

LOCKER WITH OPEN DOOR

Dimensions		cm
